T2050H-6B-US

20A SCR

DESCRIPTION:

The T2050H-6B-US triac is suitable for general purpose AC switching. It can be used as an ON/OFF function in applications such as static relays, heating regulation, induction motor starting circuits, or for phase control operation in light dimmers, motor speed controllers, and similar circuits. Capable of gate triggering in all four quadrants, T2050H-6B-US provides a very high switching capability with junction temperature of 150°C. Package TO-220B is RoHS compliant.
